Business Improvements

▲ **+15% Productivity**
▲ **+23% Positivity**

SYNOPSIS:

Since inception 20 years ago, the company has experienced continuous double digit annual growth.

Now much larger and expected to grow, the team wanted to build more proactivity and integration into their leadership without losing the agile, "can do" essentials of their successful culture.

Through the **Team Diagnostic™**, the team recognized their strengths as industry and functional experts. As the program proceeded they also became aware of the impact of operating independently, the tendency to resort to functional "silos", and the need to develop more effective communication, trust, and collaboration in order to move ahead as an empowered leadership team.

As a direct result of this program, the team is working cohesively on several high-priority, cross-organizational projects. Results include increased alignment, "all way" communication throughout the company, and improved prioritization. Interdepartmental reorganization and increased contribution to the company's strategic direction have also been a direct result.

Record revenue and profit the concurrent fiscal year was achieved.
