

POWER COACHING PACKS

COACHING FOR LEADERS TO NAVIGATE CHANGE AND CHALLENGES

THE CHALLENGE

Leadership is hard enough during regular business times. When situations get really tough or change is happening daily, even the greatest of leaders need extra support. This is especially the case when the situation is a new experience for a leader, the situation is urgent or it is critical to your organization.

THE SOLUTION

When we reached out to Churchill's clients to see how we could best support them to solve such challenges they asked for "Power Coaching." Power coaching is different to regular Executive Coaching as it is shorter, accelerated and focuses on a leader's immediate and urgent needs.

A Power Coaching Pack consists of four total hours of Executive Coaching, scheduled directly with the coach, at a cadence that works for each leader. That could mean two 2-hour working sessions to think strategically and put a plan in place, or 1-hour each week for four weeks to navigate a critical change. The purpose and value is to meet the leader where he or she is and strengthen their leadership impact. To illustrate, a leader might need a short-term expert partner to effectively navigate:

- Managing a remote team
- Strengthening personal resilience
- Ensuring wellness and engagement when working from home
- Trusting remote workers
- Leading through change and ambiguity
- Communicating and providing what employees need
- Effective role modeling
- Building trust and motivating

Churchill brings you over 200 certified and highly experienced Executive Coaches globally who deliver Power Coaching. You can view a large selection on our site @ https://churchillleadershipgroup.com/who-we-are-churchill/#_coaches

Coaches will also support each leader with tools and best practices for each unique need.

THE INVESTMENT

Each Power Coaching Pack is \$1400 to \$2200 depending on level of leader.
